LaTeX highlight demo

Vincent Kuhlmann

14 March 2021

Let's start

Beautiful code

And look at this beautiful code

```
% Here is some code
\setcounter{secnumdepth}{1}
\begin{document}
  \section{My section (and Hi!)}

  \unknowncommand\knowncommand
  \inAccA\inAccB\inAccC
  \section √2 ← cool!

  Insert literal tildes like ~. Hi!
\end{document}
```

with some text after it.

Beautiful code

Even more beautiful when we center it:

```
% Here is some code
\setcounter{secnumdepth}{1}
\begin{document}
  \section{My section (and Hi!)}

  \unknowncommand\knowncommand
  \inAccA\inAccB\inAccC
  \section $\sqrt{2}$ ← cool!

  Insert literal tildes like ~. Hi!
\end{document}
```

Continuing

Let's also show square brackets:

```
% File: document.tex
\documentclass[a4paper]{article}
\usepackage{amsmath}

\begin{document}
  Insert math like $\sqrt{2}$.
  \inAccA\inAccB\inAccC

\end{document}
```

Continuing

Let's also show square brackets:

```
% File: document.tex
\documentclass[a4paper]{article}
\usepackage{amsmath}

\begin{document}
  Insert math like $\sqrt{2}$.
  \inAccA\inAccB\inAccC

\end{document}
```

The first line was of the form `\documentclass[]{}`. Very interesting.

Continuing

Let's also show square brackets:

```
% File: document.tex
\documentclass[a4paper]{article}
\usepackage{amsmath}

\begin{document}
  Insert math like $\sqrt{2}$.
  \inAccA\inAccB\inAccC

\end{document}
```

The first line was of the form `\documentclass[]{}`. Very interesting.
Note the $ are only green because we defined it as a keyword.

Next to eachother

```latex
\begin{figure}
  \includegraphics
  [width=0.9\linewidth]
  {myPlot.pdf}

  \caption{My plot}
  \label{fig:myplot}
\end{figure}
```

You could have here code too:

```latex
\begin{figure}[htbp]
```
